📍 Dallas, TX

SUMMARY

I am a seasoned Full Stack Developer with 9+ years of experience in the IT industry, specializing in the MERN stack and modern web technologies. My expertise includes the development and design of software applications, with a strong focus on enhancing performance, stability, and user experience. I have successfully led teams and contributed to a wide range of projects across various industries, including Healthcare, eCommerce, Real estate, and Manufacturing. My skill set spans both front-end and back-end technologies, including JavaScript, React, Angular, Vue.js, Node.js, and API development. I am adept at working in Agile environments and am passionate about solving complex problems and driving innovation in software development.

WORKING EXPERIENCE

● Full Stack Developer

Technovation Town

Dallas, TX • 2021 - Present

www.technovationtown.com

- Develop UI components using React, Angular, Material UI, Rxjs and NgRx.
- Create different APIs in the backend that can be easily consumed by the front-end application.
- Work on making the application robust in terms of performance, and stability using code splitting and lazy loading.
- Assist in the development and maintenance of both front-end and back-end components of web applications.
- Collaborate with lead developers to implement new features and resolve issues.
- Participate in team meetings to discuss project progress, share ideas, and align on goals.

● Sr. Software Developer

Unified Field

Remote • 2018 - 2021

www.unifiedfield.com

- Created and updated UI components in React.js & Next.js.
- Integrated APIs to show the user relevant data.
- Executed AB tests to assess diverse features and functionalities.
- Managed routing and API integration within Next.js applications to ensure seamless data fetching.
- Configured and optimized Webpack for efficient bundling of JavaScript, CSS, and other assets, resulting in improved build performance and reduced load times
- Contributed to enhancing accessibility features, prioritizing improvements to make the application more user-friendly for screen reader users, all while actively involved in my current work.

● Software Engineer

Any Desk

Remote • 2016 - 2018

www.anydesk.com

- Developed simple single-purpose applications and APIs to solve critical business needs.
- Improved CI/CD pipelines, and software quality.
- Designed and implemented architectural solutions by utilizing building blocks from SQL and NoSQL databases, messaging services, and proxies to create scalable and efficient systems.
- Worked with client Development to develop new Features.

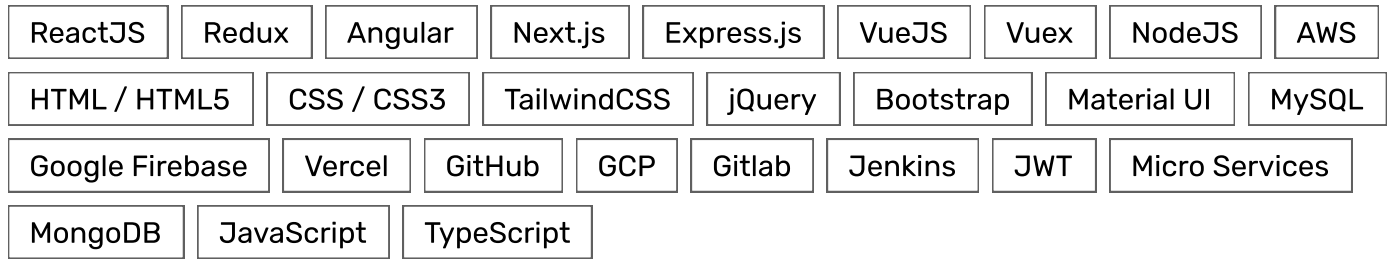

● Front End Developer

Weiter Marketing, LLC

Vernon, CA • 2014 - 2016

- Implemented email marketing campaigns using custom HTML/CSS for responsive email templates.
- Integrated of Mailchimp with website forms to capture leads and subscriber information.
- Ensured smooth data flow between the website and HubSpot for marketing automation and analytics.
- Developed dynamic and responsive user interfaces using React.
- Build reusable components to improve code efficiency and maintainability.
- Implemented static site generation and server-side rendering to enhance load times and user experience.
- Implemented code splitting and lazy loading techniques using WebPack to improve application performance.
- Worked on making the application robust in terms of performance, and stability using code splitting and lazy loading.
- Developed responsive GUIs using React, Bootstrap, Material UI, and Sass.
- Implemented Intensive custom and third-party APIs
